Employees that do not spend 100% of their time on CACFP non-profit food service functions must document the distribution of time between CACFP functions and non-CACFP functions.

### PURPOSE
To document the amount of time spent performing Food Service and Non-Food Services tasks for each day of the month. This information is used to establish the portion of costs that may be claimed as Food Service labor.

### PROCEDURE

#### When to Prepare
All full-time and part-time employees whose compensation in whole or in part is paid with Food Service funds must complete this report. The Information must account for the total activity for which each employee is compensated. The reports must reflect an after-the-fact determination of the actual activity of each employee. A separate report is required for each employee.

#### Number of Copies
Complete one original for each employee for each month.

#### Transmittal
Keep the completed and signed form in your files.

#### Form Retention
Keep the Time Distribution Report for three years from the end of the contract period. Exception: If audit findings, claims, or litigation have not been resolved by the end of the retention period, all forms and records must be retained until all issues are resolved.

1160 Verifying Provider’s Income

11160.1 Via IRS Form 1040

In the CACFP for Day Care Homes, all providers’ households will include at least one self-employed person - the provider. Because of difficulties that may exist in verifying income for self-employed persons, Internal Revenue Service (IRS) Form 1040 may be a good source for verifying a provider’s household income.

When Is It Appropriate/Not Appropriate To Use IRS Form 1040? — IRS Form 1040 is an excellent tool for sponsors to use in verifying the income of any of the provider’s household members who are self-employed. Because providers are self-employed, these individuals will lack the normal documentation of earnings (such as wage stubs or other records of pay) that are readily available to most wage earners. Although the use of the prior year’s tax form to verify self-employment income does not provide information which is quite as current as a biweekly pay stub for a wage earner, it often represents a reasonable estimate of a day care provider’s current income.

In some cases, however, a provider’s household income may have changed significantly between the end of a tax year and the time when the provider applies for Tier I status on the basis of their household income. In such circumstances, it may be necessary for a sponsor to utilize sources other than, or in addition to, Form 1040 to verify current household income.

If, for example, there were two income earners in a household, Form 1040 would not be useful as the sole source for verification if either person’s income had changed substantially. Other examples of such circumstances could include:

Change in Household Composition - The household’s composition has changed since the end of the prior tax year, due to a spouse’s death or a change in marital status. In this case, Form 1040 might still be an accurate representation of the remaining spouse’s income, but the other spouse’s income from the prior tax year would have to be excluded. In calculating and verifying current household income in such instances, please remember that the loss of some type of income may be at least partially replaced by other sources of income (e.g., separation or death will cause the loss of spousal income, but may be at least partially offset by other sources of income, such as child support, alimony, or survivor’s benefits).

Change in Household Income - Household income has changed markedly due to one member’s loss or gain of regular employment. (Here, too, it is important to remember that Form 1040 may still serve as verification of income for another household member whose circumstances may not have changed, and that at least some portion of lost income may be offset by welfare benefits, unemployment compensation, or the like.)
Change in Provider’s Income - The provider's own income has changed as a result of gaining or losing children in day care. In this situation (where the sponsor should already be aware of this change as a result of changes to the provider’s enrollment and meal claims), a reasonable attempt should be made to use Form 1040 (and attached forms showing business expenses) as a basis for calculating the provider's new income for verification purposes.

Change in Provider’s Income, cont. - For example, the current income of a provider whose prior year earnings were based on providing care for two children for the entire year might reasonably be estimated to have doubled if the provider added two day care children on January 1st. However, sponsoring organizations are not expected to sort through boxes of receipts or to retain the services of tax consultants for the purpose of determining the provider’s current household income. In some cases, such as when the provider has added several day care children with variable hours of care, it may be advisable for the sponsor to require the provider to fill out an estimate of his/her current year income and expenses on Schedule C of Form 1040 ("Profit or Loss from Business") or some similar statement of earnings and expenses.

Unemployment - A new day care home provider who was either unemployed or employed in different pursuits in the prior year. In this case, IRS Form 1040 would not serve as a useful tool for verifying provider income (though it might, in some circumstances, suffice to verify other household members’ income).

Finally, when using Form 1040 for verification purposes, sponsoring organizations should take care to ensure that the entire household’s income is reflected on the prior year’s Form 1040. If, for example, the provider has used filing status "3" (Married, filing Separately), the sponsor would also have to review Form 1040s for other income holders in the household.

How to Use IRS Form 1040 to Verify a Provider’s Household Income

The IRS and the CACFP define income differently; therefore, there is not a single line on Form 1040 that adequately captures "household income" for CACFP purposes. Although losses from self-employment, farming, other businesses, etc, and deductions from IRAs, pensions, and Social Security distributions are allowed for IRS purposes, they are not allowed for the CACFP. Business losses cannot be deducted when determining household income. For CACFP purposes, the income of a household member reporting a loss must be treated as "zero income." Example: A provider’s spouse reports earnings of $30,000 and the self-employed provider reports a business loss of $5,000 (-$5,000) on Form 1040. Although IRS would allow the provider’s business loss to be deducted from the spouses’ income to determine their total income ($30,000 - $5,000 = $25,000 total income), the CACFP does not allow the provider’s business loss to be deducted from the spouses’ income. The CACFP considers the provider's income to be "0" not "-$5,000" therefore, the household income for CACFP purposes is $30,000, not $25,000.
If you use Form 1040 to verify a provider's household income, you must always look at lines 7-22 of Form 1040 and:

- Treat all negative numbers reported on lines 12, 13, 14, and 18 as "zero income," NOT as losses.
- Use the income reported on lines 15a, 16a, and 20a, NOT the adjusted income reported on lines 15b, 16b, and 20b.
- Calculate the total household income, by adding lines 7-11, 17, 19, and 21, any positive numbers (gains) reported on lines 12, 13, 14, and 18, and the distributions reported on lines 15a, 16a, and 20a.

Record Retention

You must retain copies of IRS forms and any other information you use to verify a provider's household income for 3 years from the end of the program year.

11200 Training

Training is an organized, instructional activity designed to develop the skills and knowledge necessary for CEs to understand and comply with Program requirements and to improve the nutrition of the children and adults participating in the USDA nutrition programs they offer.

The F&N Education Unit conducts both nutrition and Program training.

11210 Training Registration

Information on training sessions, for both general nutrition education and program-specific courses, is available at the TDA web site at http://www.squaremeals.org and click on “F&N Resources” and then select training.

Online trainings are available on a variety of topics and can be accessed at any time. Any mandatory trainings will produce a notice of training completion after the participant successfully completes the course. Optional trainings do not produce such a notice but can be documented, as necessary, to meet training requirements.

Training events are scheduled throughout the state each year, typically hosted by the Education Service Centers. Although TDA and USDA have not established an annual nutrition training requirement, TDA may implement such requirements in the future.
11220  Sample Training Documentation

This is a sample of a form the F&N Education Unit uses to sign in attendees at a training event, to confirm that a registered participant attended and completed the training.

All publications are available for free download, or can be ordered through the site at no charge, while supplies last.
11320  Imported Plasticware Safety

Any supplier with an office or address in the United States must abide by Food and Drug Administration (FDA) regulations. While many manufacturers use labor and products from all over the world, they still have to follow FDA rules regarding the chemical composition of the final product.

The FDA also states that imported plasticware that does not contain bright colors or is overly soft or flexible provides little risk of migration of chemicals into food. They further noted that food should not be heated or microwaved in imported plasticware unless the plasticware is specifically made for microwave use.

11410.1  USDA, Agricultural Research Service (ARS) National Nutrient Database for Standard Reference

Using the online USDA, ARS National Nutrient Database for Standard Reference to convert Nutrient Values per Portion Size of Breakfast Cereals

2. Using the search function, type in the key word “cereals” to pull up all of the cereal selections or enter in a specific cereal you are looking for then click “submit”.

3. Choose one cereal by clicking on the button to the left of the product you wish to select (the button will be filled in to show that you have made a selection). Only one selection is permitted. If you want data for a ready-to-cook cereal, make sure you select the cereal option described as dry, e.g.; cereals, oats, dry. Click on “submit” which is located at the bottom of the product list.
4. Select the quantities and units you want data for and click submit (one or more selections are permitted):
   a. **Ready-to-eat cereals**

      You will need to select both 1 oz and ¾ cup measures to determine which serving size weighs less. (if volume data is not available, use the manual conversion method shown in attachments B and C.)

      i. *Review nutrient data for one ounce (28.35 grams) of cereal*: Select 100 grams as the description, Change 1.00 (100 grams) to 0.2835 (100 grams), and

      ii. *Review the nutrient data for ¾ cup (0.75 cup) of cereal*: Select the description measured in cups, The volume unit may be different depending on the cereal, If the unit is 1.00 (.75 cup), keep as 1.00 (.75 cup), If the unit is 1.00 (1 cup), change to 0.75 (1 cup), If the unit is 1.00 (.5 cup), change to 1.5 (.5 cup) If the unit is 1.00 (? cup), you will need to determine what number or fraction ¾ cup is of the unit provided in parentheses and change 1.00 to the number or fraction required to obtain ¾ cup

      iii. Click “submit”

   b. **Ready-to-cook cereals, dry**

      i. *Review the nutrient data for 25 grams of dry cereal*: Select 100 grams as the description, Change 1.00 (100 grams) to 0.25 (100 grams), Make sure this option is selected.

      ii. Click “submit”

5. Compare the nutrient profile provided for the cereal to the FNS Nutrient Criteria for Breakfast Cereals.

   a. **Ready-to-eat cereals**:

      The nutrient profile will show the amounts for 28.35 grams (1 ounce) and for ¾ cup. The gram weight for ¾ cup will appear in the heading. Since cereals are credited 1 ounce or ¾ cup whichever amount weighs less, choose the column having the lowest gram weight and use that column of nutrients to compare to the FNS Nutrient Criteria for Breakfast Cereals. To be creditable, the cereal must meet or exceed the minimum criteria for all five of the required nutrients.
b. **Ready-to-Cook cereals, dry:**

Since the portion size for ready-to-cook cereals is 25 grams dry, all cooked cereals will be based on 25 grams dry, regardless of the amount of cooked cereal served in the meal or how much liquid is added to cook the cereal. Compare the nutrient values to the FNS Nutrient Criteria for Breakfast Cereals. To be creditable, the cereal must meet or exceed the minimum criteria for all five of the required nutrients.

6. Print the documentation and keep on file.

Manual Conversion for Nutrients per Portion of a Ready-to-Cook Breakfast Cereal - Example

**Ready-to-Cook Cereals:** Cereal portion size from the FNS Nutrient Criteria for Breakfast Cereals = 25.0 grams ready-to-cook dry cereal

**Brand Name** _Quaker_  **Cereal Name** _Instant Grits, Real Cheddar Cheese Flavor_

1. The portion size of the ready-to-cook dry cereal on Nutrition Facts Label = 1 packet cup(s) 28 grams

2. Determine the conversion factor for nutrients (Do not round up): 25 grams divided by 28 grams (from Nutrition Facts Label) = 0.89 conversion factor for nutrients

3. Calculate the nutrients from the Nutrition Facts Label to the nutrients in 25 grams of ready-to-cook dry cereal multiplying by the conversion factor for nutrients:

11420  Child Care Recipes

The USDA website provides child care recipes that meet program requirements for CACFP meal patterns when prepared and served as indicated. These recipes can be a useful resource when planning healthy and nutritious meals for the children you serve, while offering a variety of foods to keep children interested. CEs and sites should always ensure they are using the most updated recipes provided by USDA.

The recipes can be accessed on the Institute of Child Nutrition website at theicn.org.

11430  Calculating Percentage of Calories from Fat

Example 1:
1 cup frozen cut green beans plus 1 pat butter contains 4 grams of fat. Total calories: 75

To calculate the percent of calories from fat in this food:

\[
\frac{\text{# grams of fat (4)}}{\text{Total Calories (75)}} \times \frac{\text{Calories/gram of fat (9)}}{1} = \text{48 percent calories from fat}
\]

Example 2:
1 cup low fat (2 percent) cottage cheese contains 4 grams of fat. Total calories: 205

\[
\frac{4 \times 9}{205} = \text{18 percent calories from fat}
\]

Example 3:
1 cupcake contains 4 grams of fat. Total calories: 120

\[
\frac{4 \times 9}{120} = \text{30 percent calories from fat}
\]

From this analysis, it would seem that Example 3 (a cupcake) would be a better choice than Example 1 (green beans). This is due to the low calorie content of the green beans and the higher calorie content of the cupcake. All three foods contribute the same amount of fat (4 grams) to a meal. They differ only in the amount of protein and carbohydrate and, therefore, in the calories contained.

11500  USDA Child Nutrition (CN) Labels
The USDA, Child Nutrition (CN) Labeling Program provides food manufacturers the option to include a standardized food crediting statement on their product label. CN Labels must be authorized by USDA, FNS prior to use and manufacturers must have quality control procedures and inspection oversight that meet the FNS requirements.

USDA has made lists available of authorized CN labels issued to manufacturers since January 2005, on the FNS CN Labeling Program website.

The web address for the FNS CN Labeling Program is:

http://www.fns.usda.gov/cnd/cnlabeling/authorized.htm

The website provides links to manufacturers and products that have met the Quality Control Program requirements for the CN Labeling Program, which includes the United States Department of Commerce’s (USDC) seafood inspection program and the Food Safety and Inspection Service inspection directory for meat, poultry and eggs. The lists are updated monthly.

For additional information on the CN Labeling Program and how it can be used in meeting meal pattern requirements, see Appendix C of your Food Buying Guide for Child Nutrition Programs, also available online at
