

Texas Farm Fresh Fridays

Activity Inspiration with Resources

TEXAS DEPARTMENT OF AGRICULTURE | COMMISSIONER SID MILLER

Activities Appropriate for Students in Grades 6-12

Learn About Seasonality

Ask students to come up with a creative way to display the seasonal produce information. Previous designs have been a wheel or a spreadsheet. Show them an example of each and see if they can come up with a new, creative way to display the information.

Materials needed:

- Spreadsheet of when fruits and vegetables are in season
- Paper
- Markers, crayons or colored pencils

Think Like a Farmer

Give students an annual budget and seed catalogue, and ask them to do the math of agriculture. Let them create a plan that includes plant choices, season selection, and projected yields and profits. Then they can budget what they would buy and create a planting schedule. Students can also be taught how to write checks during this activity.

To make it more appropriate for older students, incrementally throw in natural disasters and other disruptions such as farm accidents that must be accounted for when planning yearly budgets.

Materials needed:

- Seed catalogues or access to online seed catalogues
- Fake checkbooks or fake checks

Plan a Weekly Menu for Your Family with a \$250 Budget

Best for high school aged children

Materials needed:

- Internet access or price sheet for produce and other whole food ingredients
- Sample recipes using 5 ingredients or less
- Calculator

Texas Grown Fruits and Veggies Flashcard Activity

The purpose of this activity is to familiarize students with a variety of fruits and vegetables grown across Texas, and inform them of their uses in foods, as well as benefits attained from eating them.

This activity is intended to be a group, individual, and/or class activity.

To prepare flashcards for students:

1. Print flashcard pages double-sided.
2. Cut pages in half to separate cards
3. Optional: laminate cards
4. Bind pages together (hole punch and binder ring)

Keep a Food Diary

Have students begin a diary tracking the food they eat over the course of a week. This activity should include:

1. Students keeping a record of everything they eat and drink.
2. Provide an example of what the diary should look like, using different colored pens/highlighters to label which category of food each item belongs to: fruit, vegetable, grain, protein or dairy.
3. On the next school day, have students compare their diaries to the national recommendation guidelines.

The purpose of this activity is for students to be aware of the foods they eat, and to learn of any adjustments they make in their diets in order to be healthier. For even greater accuracy, consider recommending the students purchase/use a food-grade scale to measure their portions.

Materials needed:

- Writing utensils
- Colored pens/highlighters
- Paper/notebook
- Optional: food scale

Sample format:

	Breakfast	Lunch	Dinner	Snack
Sunday	1 egg 1/2 cup oatmeal 1 banana	2 slices whole wheat bread 1 ounce turkey breast 1/2 T. mustard 1 cup low fat milk 1 ounce tomato 1 ounce lettuce	2 ounces chicken breast 1 cup green beans 1/2 cup sweet potatoes 1 T. olive oil	1 cup blueberries
