

Texas Department of Agriculture, Food & Nutrition Division

2025-2026 CE List of Approved Sample Size Methods for Verification Reporting

Sample size method eligibility of listed schools was based on the following criteria:

Standard: All CEs may choose to use the Standard Sample Size Method

Alternate: The ability to use an alternate sample method must be determined annually. Those CEs that qualify for an alternate sample size must meet one of the following conditions:

– Lowered Non-Response Rate. CEs that have less than a twenty percent non-response rate for verification requests for the preceding school year (SY 2024-2025).

– Improved Non-Response Rate. CEs that:

1. have more than 20,000 students approved by household application as eligible for free or reduced-price meals as of October 1 and
2. have at least a 10 percent decrease in the non-response percentage between Year 1 (SY2023-2024) and Year 2 (SY2024-2025) qualify to use an alternate sample size method in Year 3.

If "Yes," the CE is approved to use the sample method.

If "No," the CE is NOT approved to use the sample method.

If CE is not present on the list, Verification Reporting data is not available for prior reporting years. The Standard Sample Size Method should be used.

Updated 07/02/2025
