Updates for PY 2024-25

Final Rule for School Meal Standards

On April 25, 2024, USDA's Food and Nutrition Service (FNS) published the final rule titled, Child Nutrition Programs: Meal Patterns Consistent With the 2020-2025 Dietary Guidelines for Americans, which is the next step in continuing the science-based improvement of school meals and other USDA Child Nutrition Programs (CNP), as well as advancing USDA's commitment to nutrition security.

While this rulemaking is effective July 1, 2024, USDA is gradually phasing in required changes over time. Program operators are not **required** to make any changes to their menus as a result of this rulemaking until program year 2025-26 at the earliest.

Transitional Standards for Milk, Whole Grains, and Sodium

July 1, 2022 – The USDA issued a final rule on Transitional Standards for milk, whole grains and sodium. While the changes mostly pertain to the National School Lunch Program meal pattern requirements, the transitional requirements allow serving low-fat flavored milk to CACFP participants ages 6 and older.

100	2 tsp	

¹ Scoops are left or right hand or squeeze-type that can be used for both hands. Number on the scoop indicates how many level scoopfuls make one quart. For example, eight No. 8 scoops = 1 quart.

² Use colored dots matching the brand-specific color coding of scoop sizes.

Ladles Portion Servers

3 oz	3/8 cup	3 oz
4 oz	1/2 cup	4 oz
6 oz	3/4 cup	6 oz
8 oz	1 cup	8 oz
12 oz	1-1/2 cups	—

Ladles and portion servers (measuring-serving spoons that are volume-standardized) are labeled "oz." "Fl oz" would be more accurate since they measure volume, not weight.

Use ladles for serving soups, stews, creamed dishes, sauces, gravies, and other liquid products.

Use portion servers (solid or perforated) for portioning solids and semi-solids such as fruits and vegetables, and condiments.

Cooking or Serving Spoons

Solid Spoons

Perforated Spoons

Slotted Spoons

Spoons vary in length (11", 13", 15", 18", 21") for ease of use in cooking or serving. Spoons can have plastic handles that are heat-resistant. Level scoops, ladles, and portion servers provide more accurate portion control than serving spoons that are not volume-standardized measure.

Specialty Spoons

A thumb notch on a server or spoon handle prevents the spoon from slipping into the pan and prevents hands from sliding into the food. Triple-edge (solid or perforated) spoons have a flat edge that increases the area where the spoon touches the bottom of the pan when stirring.

Infant Meal Pattern

Encourage and Support Breastfeeding

- Providers may receive reimbursement for meals containing breastmilk either provided by the mother or breastfed directly to her infant at the day care center or home.
- Only breastmilk and infant formula are served to infants 0 – 5 months old.
- For children 1 year and older, breastmilk can be used to meet the fluid milk component of a meal. A written request from a parent is not required.

	BIRTH - 5 MONTHS	6 - 11 MONTHS
Breakfast, Lunch, or Supper	4 – 6 fluid ounces breast-milk ¹ or formula ²	6 – 8 fl oz breast-milk ¹ or formula; ² and 0 – ½ oz eq iron-fortified infant cereal; ^{2,3} 0-4 tbsp meat, fish, poultry, whole eggs, cooked dry beans or peas; or 0 – 2 oz cheese; or 0 – 4 oz (volume) cottage cheese; or 0 – 4 oz yogurt; ⁴ or a combination of the above; ⁵ and 0 – 2 tbsp vegetable, fruit, or a combination of both. ^{5,6}
Snack	4 – 6 fluid ounces breast-milk ¹ or formula ²	2 – 4 fl oz breast-milk ¹ or formula; ² and 0 – ½ oz eq bread; ^{3,7} or 0 – ¼ oz eq crackers; ^{3,7} or 0 – ½ oz eq iron-fortified infant cereal; ^{3,7} or 0 – ¼ oz eq ready-to-eat breakfast cereal; ^{3,5,7,8} and 0 – 2 tbsp vegetable, fruit, or a combination of both. ^{5,6}

1 Breast milk or formula, or portions of both, must be served; however, it is recommended that breast milk be served from birth through 11 months. For some breastfed infants who regularly consume less than the minimum amount of breast milk per feeding, a serving of less than the minimum amount of breast milk may be offered, with additional breast milk offered at a later time if the infant will consume more.

2 Infant formula and dry infant cereal must be iron-fortified.

3 Information on crediting grain items may be found in FNS guidance.

4 Through Sept. 30, 2025, yogurt must contain no more than 23 grams of total sugars per 6 ounces. By Oct. 1, 2025, yogurt must contain no more than 12 grams of added sugars per 6 ounces (2 grams of added sugars per ounce).

5 A serving of this component is required when the infant is developmentally ready to accept it.

6 Fruit and vegetable juices must not be served.

7 A serving of grains must be whole grain-rich, enriched meal, enriched flour, bran, or germ.

8 Through Sept. 30, 2025, breakfast cereals must contain no more than 6 grams of total sugars per dry ounce. By Oct. 1, 2025, breakfast cereals must contain no more than 6 grams of added sugars per dry ounce.

Child and Adult Meal Patterns

The meal patterns include a variety of vegetables, fruits, and whole grains, with small amounts of added sugar and saturated fats. Additional things to keep in mind when serving meals include:

Greater Variety of Vegetables and Fruit

- Vegetables and Fruit are separate components for lunch and supper.
- Juice is limited to once per day, across all eating occasions.
- A second vegetable may be served in place of fruit at lunch/supper.

More Whole Grains

- At least one serving per day across all eating occasions must be whole grain-rich.
- Grain-based desserts do not count towards the Grains component.

More Protein Options

- Meat/meat alternates may be served in place of the entire Grains component at breakfast a maximum of three times per week.
- Tofu, soy yogurt, tempeh, and surimi are creditable meat alternates.

Less Added Sugar

- Yogurt must contain no more than 23 grams of sugar per 6 ounces.
- Breakfast cereals must contain no more than 6 grams of sugar per dry ounce.

Making Every Sip Count

- Children 1 year old must be served unflavored whole milk.
- Children 2 – 5 years old must be served unflavored low-fat or fat-free milk.
- Children 6 years old and older as well as adults must be served unflavored low-fat or fat-free milk or fat-free flavored milk.
- Adults may be served yogurt in place of milk once per day, and milk is optional at supper for adults only.

Additional Improvements

- Offer versus serve is allowed for adults and at-risk afterschool programs, excluding snack.
- Frying is not allowed as a method of preparing food on-site.

CACFP Best Practices

Infants

- Support those who choose to breastfeed their infants by encouraging them to supply breastmilk for their infants while in day care and offering a quiet, private area that is comfortable and sanitary for those who come to the center or day care home to breastfeed.

Vegetables and Fruit

- Make at least one of the two required components of snack a vegetable or a fruit.
- Serve a variety of fruits and choose whole fruits (fresh, canned, frozen, or dried) more often than juice.
- Provide at least one serving each of dark green vegetables, red and orange vegetables, beans and peas (legumes), starchy vegetables, and other vegetables once per week.

Grains

- Provide at least two servings of whole grain-rich grains per day

Meat/Meat Alternates

- Serve only lean meats, nuts, and legumes.
- Limit serving processed meats to no more than one serving per week.
- Serve only natural cheeses and choose low-fat or reduced-fat cheeses.

Milk

- Serve only unflavored milk to all participants. If flavored milk is served to children 6 years old and older, or adults, use the Nutrition Facts Label to select and serve flavored milk that contains no more than 22 grams of sugar per 8 fluid ounces, or the flavored milk with the lowest amount of sugar if flavored milk within this sugar limit is not available.
- Serve water as a beverage when serving yogurt in place of milk for adults.

Additional Best Practices

- Incorporate seasonal and locally produced foods into meals.
- Limit serving purchased pre-fried foods to no more than one serving per week.
- Avoid serving non-creditable foods that are sources of added sugars, such as sweet toppings (e.g., honey, jam, syrup), mix-in ingredients sold with yogurt (e.g., honey, candy or cookie pieces), and sugar-sweetened beverages (e.g., fruit drinks or sodas).
- In adult day care centers, offer and make water available to adults upon their request throughout the day.

Helpful Formulas

When planning how much to prepare or purchase:

$$\frac{\text{\# of Servings Needed}}{\text{Helper Sheets Factor}} = \text{Amount of Purchased Units Needed}$$

Example: 30 Servings of Applesauce, #10 can

$$\frac{30 - \frac{1}{4} \text{ c servings (Children Ages 3-5, 6-12, 13-18)}}{47.6 - \frac{1}{4} \text{ c servings / \#10 can (Helper Sheets Factor)}} = 0.63 \text{ \#10 cans needed (if a decimal, round up)} = \text{One \#10 can needed}$$

When identifying how many servings you have on hand and check your math:

$$\text{\# of Purchased Units On Hand} \times \text{Helper Sheets Factor} = \text{\# of Servings On Hand}$$

***Example:** Applesauce, #10 Can

$$20 \text{ \#10 cans of Applesauce} \times 47.6 - \frac{1}{4} \text{ c servings / \#10 can (Helper Sheets Factor)} = 95.2 - \frac{1}{4} \text{ c servings (always round down, if a decimal)}$$

1. In the NSLP and SBP (grades K-12), at least eighty percent of the weekly grains offered must meet the whole grain-rich criteria and the remaining grain items offered must be made from whole-grain flour, whole-grain meal, corn masa, masa harina, hominy, enriched flour, enriched meal, bran, germ, or be an enriched product, such as enriched bread, or a fortified cereal. Please note: State agencies have the discretion to set stricter requirements than the minimum nutrition standards for school meals. For additional guidance, please contact your State agency. For all other Child Nutrition Programs, grains must be made from whole-grain flour, whole-grain meal, corn masa, masa harina, hominy, enriched flour, enriched meal, bran, germ, or be an enriched product, such as enriched bread, or a fortified cereal. Under the CACFP child and adult meal patterns, and in the NSLP/SBP preschool meals, at least one grains serving per day must meet whole grain-rich criteria.
2. For the NSLP and SBP (grades K-12), grain quantities are determined using ounce equivalents (oz eq). All other Child Nutrition Programs determine grain quantities using grains/breads servings. Beginning Oct. 1, 2021, grain quantities in the CACFP and NSLP/SBP infant and preschool meals will be determined using oz eq. Some of the following grains may contain more sugar, salt, and/or fat than others. This should be a consideration when deciding how often to serve them.
5. [Allowed in NSLP \(up to 2.0 oz eq grain-based dessert per week in grades K-12\) as specified in §210.10. May count toward the grains component in the SBP \(grades K-12\), CACFP, NSLP/SBP infant and preschool meals, and SFSP.](#)

Considered a grain-based dessert and cannot count toward the grains component in the CACFP and NSLP/SBP infant and preschool meals as specified in §§226.20(a)(4) and 210.10.

6. Refer to program regulations for the appropriate serving size for supplements served to children aged 1 through 5 in the NSLP; breakfast served in the SBP, and meals served to children ages 1 through 5 and adult participants in the CACFP. Breakfast cereals are traditionally served as a breakfast menu item but may be served in meals other than breakfast.

7. In the NSLP and SBP, cereals that list a whole grain as the first ingredient must be fortified, or if the cereal is 100 percent whole grain, fortification is not required. For all Child Nutrition Programs, cereals must be whole-grain, enriched, or fortified; cereals served in CACFP and NSLP/SBP infant and preschool meals must contain no more than 6 grams of sugar per dry ounce.

Meal Components

Grain-Based Desserts

Grain-based desserts like those in the chart below are **NOT** creditable in the CACFP. [The USDA Exhibit A Grains Chart](#) lists many grains-based dessert, but not all.

Grain-Based Desserts (Not Reimbursable in the CACFP):	Not Grain-Based Desserts (Reimbursable in the CACFP):
<ul style="list-style-type: none"> • Brownies • Cakes, including coffee cake and cupcakes • Cereal bars, breakfast bars, and granola bars • Cookies, including vanilla wafers • Doughnuts, any kind • Fig rolls/bars/cookies and other fruit-filled rolls/bars/cookies • Gingerbread • Ice cream cones • Marshmallow cereal treats • Pie crusts of dessert pies, cobblers, and fruit turnovers • Sweet bread puddings • Sweet biscotti, such as those made with fruits, chocolate, icing, etc. • Sweet croissants, such as chocolate-filled • Sweet pita chips, such as cinnamon-sugar flavored • Sweet rice puddings • Sweet scones, such as those made with fruits, icing, etc. • Sweet rolls, such as cinnamon rolls • Toaster pastries 	<ul style="list-style-type: none"> • Banana bread, zucchini bread, and other quick breads • Cereals that meet the sugar limit and are whole grain-rich, enriched, and/or fortified • Cornbread • Crackers, all types • French Toast • Muffins • Pancakes • Pie crusts of savory pies, such as vegetable pot pie and quiche • Plain croissants • Plain or savory pita chips • Savory biscotti, such as those made with cheese, vegetables, herbs, etc. • Savory bread puddings, such as those made with cheese, vegetables, herbs, etc. • Savory rice puddings, such as those made with cheese, vegetables, etc. • Savory scones, such as those made with cheese, vegetables, herbs, etc. • Teething biscuits, crackers, and toasts • Tortillas and tortilla chips • Waffles 

- Even if a food is not listed as a grain-based dessert, it can still be high in added sugars. As a best practice, compare grains and choose those that are lower in sugars.
- Look for alternatives to sweet toppings (such as syrups, honey, and cinnamon sugars). For example, try topping pancakes with fruits instead of syrup. Starting these practices early helps kids develop healthy habits.

Meal Components Grain Ounce Equivalents

Using the Grain Ounce Equivalents Chart

1. Look at the Nutrition Facts Label
2. Determine how many grams is in a serving
 - Ex: 1 serving = 5 crackers (16g)
3. Find the grain item in the Exhibit A Grains Chart
4. Find the ounce equivalent for the grain item
 - Ex: $\frac{1}{2}$ oz eq equals 11-16 grams, so one serving of crackers (16g) is equal to $\frac{1}{2}$ oz eq of grain.

Mein noodles	3/4 oz eq = 17 gm or 0.6 oz	3/4 serving = 15 gm or 0.5 oz
3. Savory Crackers (saltines and snack crackers)	4. 1/2 oz eq = 11 gm or 0.4 oz	1/2 serving = 10 gm or 0.4 oz

Using Ounce Equivalents for Grains in the CACFP

Grains are an important part of meals in the Child and Adult Care Food Program (CACFP). To make sure children and adults get enough grains at CACFP meals and snacks, required amounts for the grains component are listed in the meal pattern as ounce equivalents (oz. eq.). Ounce equivalents tell you the amount of grain in a portion of food.

How Much Is 1 Ounce Equivalent?

20 cheese crackers
(1" by 1") = 1 oz. eq.

12 thin wheat crackers
(1 ¼" by 1 ¼") = 1 oz. eq.

5 woven whole-wheat crackers
(1 ½" by 1 ½") = 1 oz. eq.

Using the Grains Measuring Chart

The Grains Measuring Chart on pages 2-4 tells you how much of a grain item you need to serve to meet CACFP meal pattern requirements. To use this chart:

- 1 Find the grain you want to serve under the "Grain Item and Size" column.
- 2 Check if the chart lists a size or weight by the name of the grain. If the chart:
 - Lists a weight for the grain, such as *at least 56 grams*, then use the Nutrition Facts label for the item you want to serve to make sure it weighs the same, or more than, the grain on the chart. See page 5.
 - Does not list a weight or size for the grain, then you do not need to check the size or weight of the product before using the chart.
 - Lists a size for the grain, such as *about 1 ¼" by 1 ½"*, then check if the item is the same size, or larger than, this amount. See page 6.
- 3 Find the column for the age of your participants and the meal or snack you are serving. This column lists the amount of a grain you will need to serve to meet the meal pattern requirement for grains.

Lists a weight for the grain, such as *at least 56 grams*, then use the Nutrition Facts label for the item you want to serve to make sure it weighs the same, or more than, the grain on the chart. See page 5.

Does not list a weight or size for the grain, then you do not need to check the size or weight of the product before using the chart.

Lists a size for the grain, such as *about 1 ¼" by 1 ½"*, then check if the item is the same size, or larger than, this amount. See page 6.

Using the Nutrition Facts Label

Some items on the Grains Measuring Chart may have weights listed by the name of the item. Follow the steps below to see if your grain meets the minimum weight listed in the chart:

- 1 Find the grain item and its minimum weight in the Grains Measuring Chart.

For example, the minimum weight for a pancake is at least 34 grams.

Grain Item and Size	Age Group and Meal		
	1- through 5-year-olds at Breakfast, Lunch, Supper, Snack	6- through 18-year-olds at Breakfast, Lunch, Supper, Snack Adults at Snack only	Adults at Breakfast, Lunch, Supper
Pancake at least 34 grams*	Serve at Least ½ oz. eq., which equals about... ½ pancake or 17 grams	Serve at Least 1 oz. eq., which equals about... 1 pancake or 34 grams	Serve at Least 2 oz. eq., which equals about... 2 pancakes or 68 grams

- 2 Look at the Nutrition Facts label of the grain you wish to serve. Find the weight of the serving size (usually provided as grams (g)). One serving of Brand P pancakes weighs 117 grams.

- 3 Using the Nutrition Facts label, find how many items are in one serving. There are three pancakes in one serving of Brand P pancakes.

- 4 If there is more than one of an item in a serving, you will need to divide to find the weight of each item. For example, the serving size of Brand P pancakes is three pancakes.

Divide the serving weight by the number of items in one serving to find the weight of each item.

Compare the weight of one item to the minimum weight listed in the Grains Measuring Chart (from Step 1). Is your item the same weight as, or heavier than, the minimum weight?

Yes: Use the Grains Measuring Chart to see how much of your grain to serve to meet CACFP meal pattern requirements. In the example above, pancakes must weigh at least 34 grams in order to use the Grains Measuring Chart. Because each Brand P pancake weighs 39 grams, you may use the chart as a guide to the minimum serving amount.

No: Use another method to determine how much of a grain item to serve. See "What If My Grain Is Different?" on page 6 for more information.

Are There Other Menu Planning Considerations?

If you serve an item that is larger, or weighs more, than what's listed on the Grains Measuring Chart, then you might serve more grains than required by the CACFP meal pattern. The Grains Measuring Chart can help make serving enough grains easier. However, the tools described under "What If My Grain Is Different?" can also help you determine how much of an item to serve to meet the meal pattern without serving more than what is needed.

What If My Grain Is Different?

Is the grain item you want to serve:

- Smaller than the item listed on the Grains Measuring Chart?
- Lighter in weight than the item listed on the Grains Measuring Chart?
- Not listed on the Grains Measuring Chart?

If so, you will need to use another way to tell how much to serve in order to meet CACFP meal pattern requirements. You could:

- Enter information from the Nutrition Facts label into the *Food Buying Guide for Child Nutrition Program's (FBG) Exhibit A Grains Tool*.^{*} This tool will let you know how many ounce equivalents of grains are in one serving of the item.
- Use the *FBG Recipe Analysis Workbook (RAW)*^{*} to determine the ounce equivalents per serving for standardized recipes.

Grains Measuring Tools

Compare your food to the guides below to see if it is the same size or larger than the item listed on the Grains Measuring Chart.

Guides appear as actual size when this worksheet is printed at 100% on standard 8 ½" by 11" paper.
